

Dear ASPE Member,

Effective January 1, 2011, pharmacy benefits will be changing for all grantees covered under ASPE Health Benefits. Seven Corners completed an analysis of several national pharmacy companies to determine the best option for the customized needs of the ASPE Health Benefit Plan with the ability to deliver excellent service. As a result, prescription benefits will now be available through BeneScript, a division of Health Trans. (Within the US only)

Effective January 1, 2011

- Existing medications will still be covered.
- Most CVS Network pharmacies also participate in the BeneScript Network.
- Grantees will use the following information which is also available on their new ID card:
